

TCITTECH INITIATIVE

YEAR ONE

THE TCITECH INITIATIVE

Year 1 Agenda

Decentralized Identity – 3

What exactly it is, short term impact, and a description of blockchain.

Atlas Ecosystem – 6

What it is, how it will benefit the country – long term vision.

STEM Education – 9

Who is Manifezt? The TCITech-Manifezt Partnership. Begin establishing partnerships for the TCITech University.

TCITech Conference – 13

Inject energy and put the initiative on display so locals and other stakeholders can keep up with the progress.

Measuring Impact – 15

Specific goals and KPIs to track the progress the initiative is making in the country

Gov. Collaboration – 17

The preliminary ways the government can assist to ensure success

Partnerships – 19

Collaborating with the private sector and bringing disruptive companies into the country

TCITech Team – 21

The different parts of the organizational structure including Board of Directors, Advisory Board, and Management

Shifting The Paradigm – 25

How the initiative aims to shift the culture of TCI

'Blockchain Revolution' - 27

A book explaining blockchain in layman's terms, giving examples of applications, and an inspiration for this project

Decentralized ID

Own and control your own digital identity using blockchain technology.

DECENTRALIZED IDENTITY

What is Blockchain

Blockchain is a technology that has attracted investment from some of the most successful and influential companies in the world, including: Amazon, Goldman Sachs, IBM, Facebook, Google, Microsoft, Samsung, Toyota, Royal Dutch Shell, The Bank of China, JP Morgan Chase, and Apple.* These companies are investing in it is because they know the revolutionary implications of the technology, and want to capitalize on its potential – it’s widespread adoption is predicted to impact the world on the same scale as the internet.

Countries to adopt blockchain in the public & private sectors include Singapore, The UK, Canada, The United Arab Emirates, Switzerland, Japan, China, Japan, Sweden & The USA.

Rikk, Raul. September, 2018. “Estonia takes the top spot in the National Cyber Security Index”. e-Estonia.

Atlas Ecosystem

The Decentralized Map to Prosperity

ATLAS ECOSYSTEM

What is It?

Atlas is the name of the proposed open source network of government services that utilizes blockchain to:

Create Wealth

By crafting an environment that focuses on a fair distribution of wealth

Protect Privacy

By tying legal personhood to a decentralized identity, people will be able to control their digital footprint

Minimize Corruption

By injecting radical transparency into the public and private sectors while protecting sensitive information

Improve Efficiency

And efficacy of public and private services through removing human error, eliminating corruption and lowering overall cost of production

Separate TCI

As a unique investment opportunity thanks to the e-infrastructure Atlas provides

Drive Diversification

Of the economy and opportunities available to residents of TCI

ATLAS ECOSYSTEM

Long Term Goals

Key Components include:

- Decentralized ID (DiD)/Voting
- Decentralized Business ID
- Blockchain Land Registry
- Public Transport DAO using solar energy
- National Cryptocurrency/Publicly Owned Bank
- e-Taxes
- Decentralized credit score
- e-Cabinet initiatives to promote transparency in government ministries and civil services
- e-Health for holding patient records, tying it to DiD
- Microfinancing using cryptocurrency (journalism, entertainment, nonprofits, community services)
- Renewable energy trading market built on blockchain
- Peer to peer blockchain insurance

Atlas is a Titan in Greek Mythology who was ordered to hold up the celestial heavens for eternity after the Titanomachy, - as the Atlas Ecosystem can help uplift TCI, taking our country to new levels.

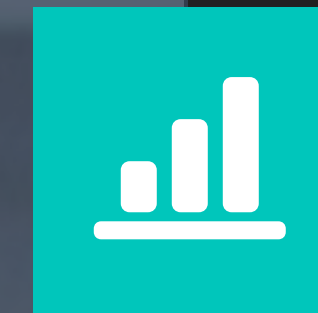

STEM Education

Hands-on, project-based learning

What is Manifest?

A 501(c)(3) nonprofit organization founded in Miami, Florida focused on STEM education.

Current programs include: Science In The City & Youth STEM.

Utilizes University volunteers to keep costs low, teaching both parties social engagement and reaching kids with peers closer to their age

Project-based learning that teaches kids how to think deeply and solve complex problems rather than simply taking tests

Hands-on STEM designed to engage students and capture their attention

Based in South Florida serving over 1200 children across Miami Dade & Broward

All programs free to participants to ensure that socioeconomic background will not prevent talented children from entering the program.

Subjects covered include coding/computer science, robotics/engineering & life sciences with a heavy focus on applicable skills applicable in targeted industries.

Youth STEM Program - an intensive afterschool program serving a total of 80 of the most talented kids in Providenciales with each participant attending twice per week

Science in The City – open workshops on Saturday's held as a community event, centralized around the marvel of space exploration, designed to spark interest in STEM careers.

South Florida is the gateway between America and the Caribbean/South America, so strengthening our ties with it can help solidify us as an additional gateway between both regions, growing the total synergy.

STEM EDUCATION
TCITech University

Strictly Tech & Arts school with emphasis on careers specifically in the industries the initiative aims to grow in the country

Partnerships & exchange programs with an accredited institutions for credibility

University built to serve 5000 students at a time. To recruit enough students, we will offer discounted tuition to high performing Caribbean students. Will be responsible for production of the shark tank style pitch competition to be included in the yearly showcase, and a series following around TCIT funded startups giving an insight into the initiative.

Free tuition to all of our citizens, extremely strict admission requirements for all international students

Strong focus on entrepreneurship in courses, and close relationship with VC arm of TCIT to fund the best ideas

TCITech Conference

Showcase & Hackathon

Momentum

First instalment of the yearly event to build excitement and momentum in technology and the arts, and to encourage a shift in the culture to accommodate the new industries.

Communication

A physical meeting allows people to see, feel and touch tech and arts industries. Including a hackathon, conference and showcase of future plans in the initiative.

Expansion

Subsequent years after the university is launched, locally graduated and upcoming talent will also generate material for local film festival, art show, concert & farmers' market.

01

Through generating a local buzz through a major event, TCITech will become a household name.

02

By immersing people in the vision, they will gain a deeper understanding of it.

03

As the initiative grows, the event will transform into the largest yearly event in the country.

Measuring Impact

Goals & Key Performance Indicators

MEASURING IMPACT
Goals & KPIs

Build The Buzz

Instagram, Facebook Page & Facebook Group, unique local donors, TCITech Merchandise sold/distributed.

Engage the Youth

Track participants' grades, career interests, and school punishment rates for comparison to their peers.

Decentralized Identity

Agreement with police force solidified and moving forward – DiD allowing transparency for law enforcement.

TCITech University

Start creating additional partnerships to transform The TCICC into the premier tech & arts college of the region.

Government Collaboration

Partnership For Prosperity

GOVERNMENT COLLABORATION

Working Together for Common Good

Taxes – introductory tax benefit for corporations/investors making qualified investments

Atlas Provident Fund – government controlled, private account for use in approved investments, receiving Atlas revenue

Student Data – in order to verify the effectiveness of the program, we need to track students grades and punishment rates

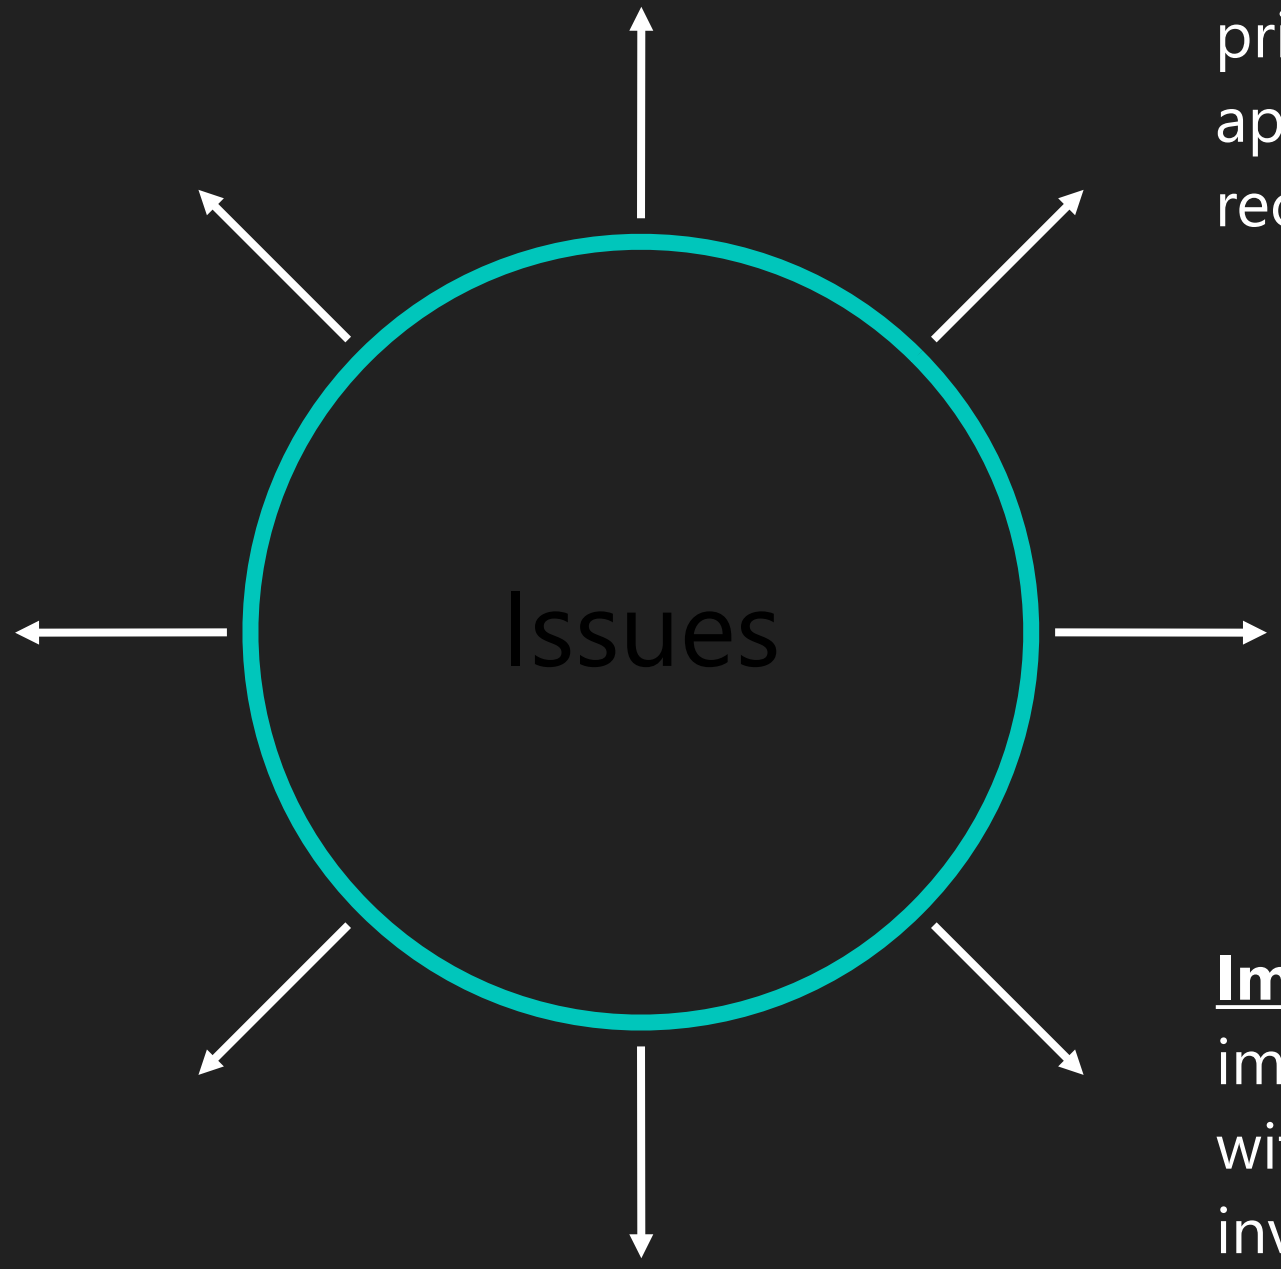

Direct cooperation with the **Ministry of Education** to update curriculums & coordinate interschool STEAM competitions..

Cooperation with the **Ministry of Tourism** to ensure we are including tech & arts in our country's branding/marketing.

Tuition – ensure any local admitted to the TCITU will have his tuition covered by the government, debt free

Immigration – open up immigration for people with skills or qualified investments in targeted industries

Land – give a home to local techpreneurs; the government can incentivize the construction of a coworking space, university & dorms

Partnerships

Targeted Entities including corporations and governments.

Targeted Research & Development Partnerships

TCITech Team

Board of Directors and Advisory Board

TCITECH TEAM
Board of Directors

Executive Director – Jay Sadler

Experience in finance & education industries. Director of Development for a STEM nonprofit in South Florida. Background in economics and finance from The University of Miami.

Financial Controller – Nick Haywood

PwC Territory Leader, 25 years of experience with PwC in The UK, Malawi & TCI with clients in consumer & industrial products & services, information, entertainment & media, and financial services.

Director of Technology – TBD

The first priority after receiving funding will be to hire a fulltime blockchain developer to begin mapping research and development strategies for the various Atlas Ecosystem Initiatives.

TCITECH TEAM
Advisory Board

Dr. Carlton Mills
Founder of The Mills Institute,
Former Minister of Education

E. Jay Saunders
Chairman & CEO of Domus
Semo Sancus, and Deputy
Leader of The Progressive
National Party

Stan Hartling
CEO & Lead Partner of The
Hartling Group

Carlos Simons
Senior Partner at Miller
Simons O'Sullivan

Sandy Lightbourne
Chairman of the Board of
British Caribbean Bank,
Former Chairman of the FSC &
40 years banking experience

Dawna Henderson
Founded henderson bas in
1999, now brand consulting
for blue chip companies &
tech start-ups

Cutella Talbot
Local Pastor, Radio
Personality & Public Figure

Carl Simmons
Owner of Tropical Shipping,
Turks & Caicos

MoE Representative
Proposed seat being saved
for the Minister of Education

TCITECH TEAM
Middle Management

★
Executive Assistant
Assisting both Executive Director and Director of Technology in remote office

★
Content Manager
Produces the documentary explaining TCITech and the vision to key stakeholders, and captures footage

★
Associate Director
Point of contact in TCI when Executive Director isn't there, helping manage implementation

★
Marketing Manager
Manages Social Media, internet presence, creates and distributes content to engage community

★
Youth Relations
On the ground in TCI ensuring workshop attendance and managing Manifest relationship

By maintaining a weighted combination of people on the ground in TCI, and abroad in the remote office, we will be able to attract and build the right partnerships abroad, and manage the implementation in TCI of both the Atlas Ecosystem government partnership, and the partnership with The Manifest Foundation.

Shifting The Paradigm

Through Traditional and Social Media

SHIFTING THE PARADIGM Community Buy-In

TCITech Documentary
Through working closely with a local film maker, we will create a 'John Oliver style' documentary laying out what exactly The TCITech Initiative is and how it will benefit TCI using eye catching visuals.

Social/Traditional Media
Used to push and promote documentary, and to encourage engagement within the community. Will aim to increase public interest in tech & arts industries, along with promoting technological literacy.

Transformation
Ultimately grow TCI into more than simply a tourist destination, but also the center of research and development for tech in the Caribbean and a major regional contributor to the arts.

Capturing the hearts and souls of Turks Islanders is an integral part of the initiative. The long term goal is to get the community passionate about these industries so we encourage our youth to pursue meaningful, fulfilling, and high paying careers in both the tech and arts industries. Creating a motivated and trained local workforce, and opening our arms to skilled immigrants in these industries, we can create an ideal labor market to attract influential companies in those industries and grow local entrepreneurship.

Blockchain Revolution

By Don Tapscott & Alex Tapscott

BLOCKCHAIN REVOLUTION A Must Read Book

Blockchain Explained
Clearly communicated for the average
person without technical knowledge

Inspiration
Opens the mind to the many
applications of blockchain.

Influence
Written by some of the most
well known ambassadors for
blockchain
